TAKING OUR RESPONSIBILITY

**ENVIRONMENT**

## WORKING TOWARDS A WASTE-FREE F&B

At The Student Hotel, we're constantly studying the way we're currently doing things, while stimulating sustainable and conscious behavior. In order to minimize our ecological footprint, we're always working to implement smarter processes and technological innovations. We've recently started working with waste management company Milgro to maximize our efforts to reach our goal — zero waste in our F&B operations.

## SUPPORTING A DIVERSE COMMUNITY

We want to offer our guests a sustainable, inspiring and safe environment that enables them to focus on the important things in life. That's why we're working to make The Commons accessible to anyone and growing our team to be a diverse community.

## REDUCING ENERGY CONSUMPTION

Reducing our energy consumption is one of our main goals, so all our new locations are built with sustainable value and efficiency top of mind by using BREAAAM, the world's leading assessment method for sustainability. Our restaurants are closely followed for real estate sustainability by using the GRESB standards.

## SUSTAINABILITY IS IN OUR DNA

It's incredibly important to us to know where our food comes from, what ingredients are in it and how it's been produced — and whenever we can, we buy seasonal, local food. These conscious business practices extend to the furniture we buy, the cleaning products we use and much more. Our goal is to commit 10 percent of our resources to help the world — and we're on the right track to get there.

## SERVING MADE BLUE WATER

Tap water isn't just tasty and healthy, it's also sustainable. The unfortunate reality is that there are too many countries where people have to walk for hours to get access to water, which often will be polluted. We think that should change, so that's why we serve MADE BLUE water. This perfectly cooled water is filtered and bottled in-house and we donate 700 liters of fresh drinking water per bottle served.
